A USA Non Profit Organization Who Feeds Malnourished Children . . .

Outdoor Feeding Kitchen Construction

This Outdoor Commercial Kitchen Will Feed Up To 250 People Including Children, Volunteers, & Missionary Team Members

We are expanding our capacity to feed children, families, volunteers, and missionary groups who come to put their hands to the Global Food Providers plow. Our plans include huge cooking pots that will cook on open fire and with natural gas when needed. Plans include a commercial gas grill, a pizza oven, and a commercial sized smoker for pork, chicken, turkey, and beef. It will be the most glorious and productive outdoor kitchen in Chiriqui, Panama!

We Need To Feed More!

We Are Building A Glorious, Fully Licensed, Commercial Sized Outdoor Kitchen

At this time, our cooks are working on a sub standard, uncovered, slick and sometimes dangerous cooking location. They have made the best with what they have. But moisture and wind are causing great difficulty. At our very best, we can cook for 80 people. But we need to feed 250.

Imagine quickly and effortlessly feeding those 250 people with updated, commercial equipment in a strategically designed kitchen.

heart of the individual and gives us a platform to teach, instruct, impart life betterment strategies, and confirm the love of God to all.

From huge pots of rice, beans, soups, & stews, to bbq & smoked meats, to personal tasty pizzas created for missionary team members who have come to serve the

Our capacity to feed people needs to grow as the crowds are growing..

This glorious outdoor kitchen is a dream come true for our volunteer cooks. They have survived harsh and sometimes dangerous outdoor conditions to

people of Panama. We must grow our capacity to cook for large numbers of people. The outdoor kitchen concept is the best design for working in the tropics, with a 9 month of Panama rainy season each year.

Feed the poor, the widow and the orphan without ever complaining. We are so proud of them. Now is the time to upgrade as our crowds are growing!

Our theme has always been, "Food is Power, and whoever has the food, has the power". When food is offered to the community, to volunteers, or to a missions group, this dynamic opens up the

Global Food Providers/Children's Feeding Network Prototype Farm & Dehydration Center Potrerillos, Chiriqui, Panama

Outdoor Commercial Kitchen Construction - 2024

Total Project Cost:

\$13,275

**Includes a fully licensed outdoor covered kitchen with multiple cooking stations, an inset bbq grill, a three bin stainless steel sink, a meat smoking station, wood fired pizza oven, microwave, 32 feet of volunteer food preparation work space, and under counter stainless steel lockable cabinets. The infrastructure includes retaining walls, 3" concrete & tile floor, a full overhead roof, lots of electrical circuits/outlets and fresh hot and cold water.*

(Concrete & tile flooring \$2,610, retaining wall & backsplash walls for kitchen, \$1,740, electrical, plumbing, lighting \$1,870, concrete, tile & brick countertops & work tables \$1,215, Outdoor grill \$720, pizza oven \$465, 3 bin commercial sink \$2,520, steel lockable cabinets underneath \$930, 3 hanging pots for wood fire cooking or gas cooking \$720, smoker for chickens, pork, etc., gas retrofit kits \$485.)

This program will expand our capacity to safely and efficiently feed large groups of people (250+).

We currently struggle with antiquated methods of cooking on unprotected dirt and gravel. Our current capacity is approximately 80 people, but our crowds are as high as 200+. This glorious, covered, outdoor kitchen will allow our volunteers to efficiently cook for 250+ people, and will provide a capacity for missions teams and volunteer groups to walk through and get their freshly prepared food in a cafeteria style. We will also be able to prepare mobile meals for catastrophic events in the area where we need to feed emergency workers & personell.

This is a photo of our contractor's work, whom we plan to hire for our kitchen construction. Our kitchen will feature 32' of counter space, a 10', 3 bin stainless steel sink, a larger pizza oven, 10' of grilling/cooking space, and a roof covered environment for cooking in all types of weather.

This is the quotation From Our Professional Stainless Steel Sink Manufacturer. This is a 3 bin commercial level sink unit which is 18” deep and features 35” x 36” bins. Installation & faucets add \$320. This will be a multi-purpose sink and includes the capacity to wash all pots, pans, utensils, plus washes hundreds of pounds of fruits and vegetables.
