A USA Non Profit Organization Who Feeds Malnourished Children . . .

## Commercial Security Fencing & Cameras

*This commercial level security upgrade will provide licensing to export our superfoods to global areas of greatest need.*

We are quickly coming to the place where we need greater security on our farm and dehydration center. Our success has drawn the attention of many in Panama, and we are presently vulnerable to criminal activity.

We also need a commercial standard of security to qualify for export level licensing of our superfoods for the poor. It's a requirement that food grade production facilities are secure from wild animals, pets, and humans who are not part of the professional licensed process.

## Gates, Fences, & Cameras

### Security Is Important To Guard Against Thieves, Intrusion, & Property Destruction

*Global Food Providers Farm & Dehydration Center has become a hub of activity and attention. We are quickly becoming a highlight spot in Chiriqui, Panama because of our community assistance programs, farm to table superfoods growing, and amazing educational programs.*

We need to quickly construct two large electric entry gate systems, as well as 1,650 feet of security fencing around our facility.

While we are located in a small rural community in Chiriqui, Panama, we have great exposure to those who may have nefarious intent, thieves, unwelcomed guests, or even a herd of cattle who may decide to enter our facility and destroy crops and structures at night.

Manager Dr. Daniel Daves says, "We really must secure this facility in Panama quickly for a variety of reasons".

Security has become a top priority for GFP. A controlled environment is essential to successful continuation of operation in Panama.

Progress requires heightened security. Global Food Providers is quickly working towards the required government licensing to

be able to ship our powerful superfood powders to global hot zones where nutritional crisis and famine are hitting vulnerable populations. In order to

qualify for this licensing, we are required to provide security fencing, gating, & cameras. A fully controlled facility is needed to assure quality and safety of exportable foods.

# Global Food Providers/Children's Feeding Network Prototype Farm & Dehydration Center Potrerillos, Chiriqui, Panama

Commercial Security, Fencing, Gating, & Cameras - 2024

**Total Project Cost:**

**\$40,760**

*\*Phase #1 and #2 Include two electric entry gates, 1,650 feet of tall security fencing & entry points, an array of online infrared inside/outside cameras, and motion sensing, solar security lighting.*

**Phase #1:** Purchase and Installation of 16 security cameras & online monitoring system for the main farm/dehydration facility, Tall lighted, electric entry gate, an inside electric entry gate, and 300' of security fencing. Also includes tall streetlight, solar powered, motion detecting lighting.

\*16 camera security system professionally installed: \$3,170

\*2 Electric gating systems with tall lighted rock posts: \$7,220

\*300' security fencing installed (\$1,650 per 100') \$4,950

\*8 tall property lights solar powered. \$2,120

**TOTAL PHASE #1 SECURITY UPGRADE: \$14,940**

**Phase #2:** 1,350 feet of tall security fencing around entire farm & dehydration center. Installation of security cameras at the far ends of the farm. Installation of tall streetlight, solar powered, motion detecting lighting at far ends of the farm.

\*4 wifi camera cameras installed back corners of farm with electric: \$1,425

\*1,350' hurricane security fencing installed (\$1,650 per 100') \$22,275

\*8 additional tall property lights solar powered. \$2,120

**TOTAL PHASE #1 SECURITY UPGRADE: \$25,820**
