Case Skid Steer Update

A USA Non Profit Opportunity That Feeds Malnourished Children . . .

Case Skid Steer Update & Garage Construction

We plan to build an open garage for our skid steer and a tractor, complete with electricity, running water, and a work area.

This Case skid steer has been a game changer for our prototype farm and dehydration center in Chiriqui, Panama. We flip compost, repair roads, haul dirt, dig up root crops and so much more. This unit literally replaces an 8 hour work day for a manual worker every 40 minutes that it operates.

Saving time, energy, and money is the key to successful farming when you grow food for the malnourished, widows, and orphans in the third world.

We Need To Protect This Skid Steer
We are constructing a 20' x 15' open air metal building that will hold a skid steer and tractor.

We have learned to build fast and cheap, using the best materials available in Panama. This building will fully protect our skid steer from the heavy rains that come daily nine months out of the year. It will also be secured at night and will feature extra space for work & repairs.

The covered, open air garage will feature a sliding gate system for security, electrical outlets, security and work lighting, and a wash and work facility. And the additional space will provide secure covered protection for our other motorized equipment and a future tractor that we have our eyes on.

We have a narrow window of time to build this structure, from January – March 2024 before the heavy rains hit. We want to thank

Protection of our equipment is important in the hostile weather of the tropics.

you for considering this important project at your “end of year” planning. At the end of the day, this skid steer is helping us to feed more malnourished children and needy families.

Global Food Providers/Children's Feeding Network Prototype Farm & Dehydration Center Potrerillos, Chiriqui, Panama

20' x 15' outdoor work & storage garage for our Case Skid Steer - 2024

Total Project Cost:

\$8,260

**Includes a sturdy built metal building exactly extended from our 60' egg laying chicken facility. Includes plumbing, wash basin sink, work tables, electric outlets, security and night lighting, sliding security gate and fencing.*

**Also includes \$1,900 maintenance work on the Case Skid Steer to grease, adjust linkage, change fluids, repair night lighting, and general annual maintenance.*

This program will expand our capacity to protect our equipment. We will be able to work on our equipment, protected from sun, rain, and harsh winds. Our equipment will also be safe from theft
